

WEEK 3 - PARACHUTES, EGG DROP

PARACHUTES, EGG DROP

Plan:

Read book

What is the difference between flying and falling?

What are "aerodynamics?"

What is "Bernoulli's Principle?"

Use plastic grocery bags, polyester batting, tape, yarn, etc. to find ways to protect and slow down plastic Easter eggs. Drop them from the balcony and time their falls. Then give the kids 5 minutes to try to improve their designs and time the eggs again on their second flight.
